

# Petra, Angel Of Light

City lights are flashing, they call you to the streets  
Hearts are filled with passion in everyone you meet  
The Boulevard is waiting, it wants to get you high  
Neon signs are waiting to sell you anything you want to buy  
But I know your devices, it shouldn't seem so odd  
You lied from the beginning, I see through your facade

(Chorus)

Angel of light, I see you glow in the night  
But you only bring darkness to my soul  
Angel of light, You're telling me wrong is right  
I won't let you're evil take control

They follow in your footsteps not knowing that you fell  
Bumper to bumper on the freeway to hell  
You lead them into wrong and you make it look so right  
You lead them into darkness and make them think you lead them into light  
But I know where you're going, too bad you're not alone  
If it wasn't for the real light I might have never known

Angel of light, I see you glow in the night  
But you only bring darkness to my soul  
Angel of light, You're telling me wrong is right  
I won't let you're evil take control

You got the clergy working overtime to widen the narrow way  
You've got politicians everywhere listening to what you say  
You've got false apostles teaching lies perverting the only way  
You've got principalities and powers waiting to obey  
You've got philosophies and vain deceptions lying to deceive  
You've got hate, and greed, ungodly lusts in the deadly web you weave  
Somehow you've got so many thinking you're not even there  
One look is all it takes to get them blinded by your glare

Angel of light, I see you glow in the night  
But you only bring darkness to my soul  
Angel of light, You're telling me wrong is right  
I won't let you're evil take control
