

# Phantom Planet, Sleep Machine

Some things melt away,  
As night dissolves to day  
Some things only stay,  
As silent darkness slowly kills me, Oooh  
I turn to you,  
And stir your blank expression,  
You're the one for me  
Help me get to sleep  
(nightynight goodnite)  
Something isn't right,  
It seems that every night, I need you

More and more,  
You take me away,  
More and more,  
I need you to stay ,  
More and more,  
distract me from  
the instant lost of light,  
more and more, I need you tonight

Come let's go for awhile  
and pretend you're mine for awhile  
Come let's go  
Yeah,

More & more  
You take me away,  
More & more,  
I need you to stay  
More and more  
distract me from  
the instant loss of light  
More and more,  
I need you.... Good night
