

# Phil Vassar, Thats When I Love You

When I hear you stop and laugh out loud  
When you're falling fast asleep  
You're in the middle of the crowd  
When you're lying close to me  
When I hear you softly say my name  
When you're high and when you're low  
You don't need me to explain, you already know  
When you smile, that way  
I know, every night and day

## CHORUS

That's when I love you  
When I need you  
When I care about you  
That's when I know without a doubt, that I can't live without you  
Everyday I find another reason, every season we go through  
Every little thing you do  
That's when I love you

When you're driving in your car  
When you dance and sing to the radio  
When you're walking underneath the stars  
Anywhere and everywhere you go  
Dressed up or you're dressed down  
When you're talking on the phone  
A million people all around  
When you're all alone  
When you're near or you're far  
You're in my heart, no matter where you are

REPEAT CHORUS UNTIL END
