

Pillar, Awake

Midnight I've fallen fast asleep
Daylight I can't remember anything
So many questions that get in the way
About the place I keep sleeping awake

So wake me and tell me what you see
Let me walk with you in the streets
The streets with no name cause I feel far away
And as I wake I only fail to remember

Why do I feel like I'm slipping away
Why do I feel so far away
Wake me up inside my dreams
Just in time for me to believe

Another morning chasing lies
After another evening chasing skies
So make tonight my reality
So tomorrow I remember everything

Why do I feel
Like staying awake when I fall asleep

I don't wanna feel
The pain never ends cause it never began
