## Pink, The One That Got Away

Mmmm mm yeah Oh oh I stood by the exit door of the hotel cafe He was playing with his band I've always been a sucker had a weakness for a boy with a guitar and a drink in his hand His words were like heaven in my hurricane My knees buckled under I thought everyone was watching me Watching you save my life with a song

You were mine In the back of my mind Oh just for one night Just for a while

There's always one that gets away The one that sneaks up on you then slips away

Two weeks later I was sitting in his apartment He was making cappuccino I said what kind of man makes cappuccino We laughed, We laughed, We laughed We laughed til tears ran down my face

Oh but my man you're someone elses man And that ain't the man that I want But you keep drawing me in with those big brown lyin' eyes

You'll always be mine In the back of my mind Oh we had a night Just a little wine

There's always one that gets away The one that sneaks up on you then slips away

In a closed off corner of my heart, yes I'll always see your face The one that got away (One that got away) The one that got away (The one that got away) Oh the one that got away (The one that got away) Oh the one that got away (The one that got away) Oh the one that got away) Oh the one that got away Yeah yeah Oh oh oh oh Yeah yeah Oh

I'm not a victim of cliches I don't believe in soul mates Happy endings or the one Oh and I met you and all that changed I had a taste and you're still sitting on the tip of my tongue

You were mine Somewhere in time I'll look for you first In my next life

There's always one that gets away

The one that sneaks up on you then slips away Slips away In a closed off corner of my heart yeah yeah yeah yeah I, I'll always see your face The one that got away (The one that got away) The one that got away) Oh the one that got away (The one that got away) Oh the one that got away) Oh the one that got away (The one that got away) The one that got away) The one that got away Yeah yeah Oh oh yeah The one that got away
