

# Piston, Electra Complex

It's mysterious it's blind faith this way I feel for you  
Love me last take my hand daddy I dress for you

Do you feel the same way feel the same way the same way that I do

It's godflesh a moments touch this scent I have for you  
I know I'm wrong this feel is strong explain no not too soon

Do you feel the same feel the same way the same way that I do

Worshipping the ground that you walk on and it's wrong  
Capturing this feeling deep inside this song  
Expressing all my fears this bloodline seems so long  
I'll end it with a kiss a kick a punch no more

It's syncopation a generation 20 years too soon  
A crazy wish a burning itch now leave me alone you

Do you feel the same way feel the same way the same way that I do  
Feel the same way feel the same way the same way that I do  
You feel the same way feel the same way the same way that I do  
You feel the same way feel the same way the same way that I do
