

# PJ Harvey, My Own Private Revolution

Fate has always  
One might say  
Driven me  
From place to place

Love on the stage  
Love on the stage  
Up and carried  
Me away

I have pursued my dream  
All across the sky  
All across the soil  
And left my joyous town  
When I was young  
I watched it from my door  
With the eyes of a child  
You seemed so clear

My own private revolution  
My own private revolution  
In my own private revolution  
My own private revolution

Over the town  
We fly out  
Lovers embracing  
Outside the golden gates

Love on the stage  
Love on the stage  
Nor must we endure  
Any separation

Over the town  
Revolution  
We fly out  
My own private revolution  
Over the city  
Made my own private revolution, revolving  
We fly out  
My own private revolution, revolving

I have found purity  
Simplicity  
Inside the face of children  
The voice of divinity  
In my own private revolution

My own private revolution  
Over the town  
Made my own private revolution  
Over the city  
Revolving  
My own private revolution, revolving  
Tempt me, must be heaven sent  
With my own private revolution, revolving
