

Plain White T's, You And Me

You and me, we like the same kind of music
That's why we, make a good you and me
We got style, baby we know how to use it
That's why we, make a good you and me

You know what I'm going to say before my mouth even makes a sound
And that's why we make a good you and me

You and me, we couldn't stand being normal
That's why we, make a good you and me
We both laugh, at the most random situations
That's the key, baby don't you agree?

You know what I'm going to say before my mouth even makes a sound
And that's why we make a good you and me
I know from the sound of your breathing exactly what you are feeling
This is why we make a good you and me
Make a good you and me
Make a good you and me
You and me

Ah ah ah
You and me, all we need is each other
That's why we, make a good you and me

You know what I'm going to say before my mouth even makes a sound
And that's why we make a good you and me
I know from the sound of your breathing exactly what you are feeling
This is why we make a good you and me
Make a good you and me
Make a good you and me
You and me
