

Planet Funk, Late

Inside all the people a jet black spark
rippeling like magma in their hearts
under all the hot lights n' gyroscopes
physically pulsing as the shake of their bones
feeling kinda lonely we're fucked up and cold
feeling kinda lonely underneath the soul
I was... feeling kinda lonely
boys are shaking girls are rotating
make my real life melt into the floor
boys are shaking girls are rotating
make my real life melt into the floor
inside all the people an onyx flame
flickering and rising into their brains
smothered in a blue light
covered in a noise
Oscillating girls
Oscillating boys
feeling kinda lonely we're fucked up and cold
feeling kinda lonely underneath the soul
I was... feeling kinda lonely
boys are shaking girls are rotating
make my real life melt into the floor
boys are shaking girls are rotating
make my real life melt into the floor
make my real life melt into the floor
boys are shaking girls are rotating
make my real life melt into the floor
boys are shaking girls are rotating
make my real life melt into the floor
