

# Plus One, I Don't Care What It Takes

Could it be yesterday  
I coulda swore the same thing  
Happened just the other day  
Put on the spot  
Now what am I gonna say  
If I tell them who you are will they think that I'm insane  
Do I really care?  
Well yes and no, maybe so  
'cause if they don't think you're real how will they ever know  
So I won't stop  
'cause even if they laugh at me  
It doesn't change a thing about what I believe (what I believe)

(chorus:)  
I don't care what it takes  
I don't care who it shakes  
I don't care what they say  
I'm gonna do it your way  
Even if I'm afraid, don't wanna make you look fake  
I don't care about anything it's not about me

You make me feel secure  
You've given me your word and  
Now I know I'm sure  
I was so messed up  
Like a wheel you turned around

My fate  
When I thought you were just  
Something up in outer space  
But that's not the case  
You're more real to me  
Than what they make you out  
To be on tv  
Can you turn me up  
'cause you know we're getting serious  
When we talk about the invisible  
It's so clear to us (so clear to us)

(repeat chorus)

I don't care about the things that  
Used to keep me far away from you  
They left me so confused  
I don't care about the fear that tries to fill me up with so much doubt  
It turns me inside out  
So if they start to wonder  
And they start to stare  
You know it don't matter cause  
I don't care

(repeat chorus)
