

Plus One, With All Your Heart

You make this world a better place
When you try your best each day
Just listen and your heart will show the way
It'll make you strong inside
Everytime you do what's right
In the time of darkness you'll find light
You'll find you have the courage within
To fight for what you truly believe in

Chorus:

With all your heart
I know you can do anything
With a little faith you can reach right up to
The highest star
There's no mountain you can't climb
Just look inside your heart you'll find the strength inside
All you have to do is try
With all your heart

There's a difference you can make
So never underestimate
The power of what one can really do
And nothing's gonna stand in your way
'Cause now you know you've got what it takes to save the day

Chorus

If you start to stumble
And if you start to fall
Just keep reaching for your dreams
And you know you're gonna catch them all

Chorus

All your heart, All your heart
With all your heart
Ooo ooh
