

# Poison, Shooting Star

a small town girl with big time dreams

but nothing's ever as it seems

a mother waves her girl goodbye

then slowly hangs her head and cries

hollywood hills and the big city lights

outside her window they burn bright

someday the world will praise her fame

they'll know her face they'll shout her name

pre-chorus

they'll shout it real loud

she'll make her mama real proud

she'll stand about the crowd

Chorus

i am someone

look what i've done

stare into the sun

i am a shooting star

i am something

i am someone

look what i have done

i am a shooting star

she looks down at the stars lying on the streets

says to herself "that will be me"

a big time dream a small town mind

searching for a break she may never find

streets of gold they turned to gray

just one more chance just one more day

someday that world will know this face

she swears they'll never fall from grace

they'll shout it real loud  
she'll make her mama real proud  
she'll stand about the crowd  
and shout  
chorus (solo)

she stand out on the streets in the pouring rain  
strangers walk by they don't know her name  
as the silver screen slowly fades to black  
she'll never give in she can never go back

chorus

someday you'll see me  
don't you need me  
everybody will believe me  
i am a shooting star

i will stand strong  
i will hold on  
it's not my last song  
i am a shooting star
