

Polaris At Noon, Viewer From Afar

Do you mind the dead of night
When our minds begin to fly?
Racing through the cloudy skies
Please keep turbulence in mind
I've got a sound to fill the air
You won't be here with me to share
'Cause I don't quite know who you are
I'm just a viewer from afar

Take control and save our souls

You want to make a move?
Come from the other side
Feel the friction build until we all collide
The slightest fall will send us through the night
Take a chance and put it on the line
Turn around and kiss it all goodbye
'Cause I don't need a thing when you're around
When you're around

Do you mind the dead of night
When our hearts begin to fly?
Wishing for the softest touch
Well I'm just asking for too much
Won't you screw your head on tight?
'Cause this is not how you should fight
I've gotta smile for all the eyes
But I'm just falling in disguise

Take control and save our souls

You want to make a move?
Come from the other side
Feel the friction build until we all collide
The slightest fall will send us through the night
Take a chance and put it on the line
Turn around and kiss it all goodbye
'Cause I don't need a thing when you're around
When you're around

You want to make a move?
Come from the other side
Feel the friction build until we all collide
The slightest fall will send us through the night
Take a chance and put it on the line
Turn around and kiss it all goodbye
'Cause I don't need a thing when you're around
When you're around, when you're around
When you're around, when you're around
