

Porcelain And The Tramps, Fuck Like A Star

Haha,
If there's a fucking problem with the fucking shit in
This fucking song we can fucking edit it out for the fucking god damn radio.
Fucking god damned cunt ass mother fucking bitch ass fuck face.
Suck my big fucking black dick and I wanna see that ass clap, bitch.

She puffs a little cigarette and paces in the lobby
Silhouettes of pure white skin
A super in post-party
She is the string that holds your fate
The one that gets it started
So if you've got the balls to fight then put your mouth around it

Oooh I know you're out of it
Oooh I know you want it
She fucks like a star
All way to the top
Mess with your head
Make you want it
Fucks like a star
So rated R
You'll do anything
'Cause she fucks like a star, fucks like a star

Anorexic beauty queen with panty lines so toxic
Flowers painted on her back
Centerfold erotic
She's had a gram, a shot, a slam, enough to start a riot
Everybody wants a piece
But only I'm invited

Oooh I know you're out of it
Oooh I know you want it
She fucks like a star
All the way to the top
Mess with your head
Make you want it
Fucks like a star
So rated R
You'll do anything
Because she fucks like a star, fucks like a star

Oooh she make you want it you want it
Oooh you fucking love it you love it
Fucking fuck like a star, star, star
You fucking fuck like a star, star, star
I'll fuck you like a star, superstar
I'm gonna fuck you like a superstar star star star
She fucks like a star
All way to the top
Mess with your head
Make you want it
Fucks like a star
So rated R
You'll do anything
'Cause she fucks like a star, fucks like a star

I'll fuck you like a star, superstar
Fucks like a star
I'll fuck you like a star, superstar
Fucks like a star
I'll fuck you like a star, superstar
Fucks like a star
I'll fuck you like a star, superstar

Fucks like a star
I'm gonna fuck you like a superstar star star star
Fucks like a star
Fucks like a star
I'll fuck you like a star, superstar
I'm gonna fuck you like a superstar star star star star

Hahaha, haha
Oops!
