My life's not the same without you girl good times now for me are mighty few  
The blues treat me at each evening's sundown lonely lonely lonely without you  
Darkness falls around me like a blanket as I search my mind and I wonder what to do  
Lonely sure is lonely with no loving my world sure is lonely without you  
Your leavin' turn the lights off in my world girl  
Your picture in my mind calls out your name  
Only you can stop this lonely feeling lonely without you to ease the pain  
Darkness falls around me...  
Lonely lonely lonely without you
