

# Powerspace, Powerspace Snap Bracelet

Lightning strikes me down  
I'm on my knees  
I can't write it out, but I'll show you what I mean  
And the words, they will drip down the side of your cheeks  
And I'm able to read them when they spell out  
"Let's just be friends";  
Four simple words that  
We keep on ignoring again and again  
(As if we never even meant it)

Baby, let's leave them all for dead  
All those thoughts inside your head can be reality  
So let yourself believe

My life is a cross of a fire and a stampede  
I burn inside, you still run after me  
Yeah, we'll find out how it feels to burn alive  
Oh, you and me, girl  
Let's set ourselves on fire  
(As if we never even meant it)

Baby, let's leave them all for dead  
All those thoughts inside your head can be reality  
So let yourself believe

Oh yeah, we don't care who finds out  
Tonight is all that matters right now  
Let's go once more down to the dance floor  
Make me sell my soul for more

(Even when we fall asleep together)

Baby, let's leave them all for dead  
All those thoughts inside your head can be reality  
So let yourself believe  
I feel your body radiate in the lightning we create  
So let yourself believe

Oh yeah, we don't care who finds out  
Tonight is all that matters right now  
Let's go once more down to the dance floor  
Make me sell my soul for more
