

Powerspace, Quarantine My Heart (Baby)

We don't need a party
Just a place to meet
My mind is still racing while the city sleeps
But I don't complain
Cause I know we're okay

Race against the clock
Running on no sleep
When there's no time to rest
And there's no need to dream
Cause when you're with me
I feel like I'm dreaming

I hang out and hold on
(And count the days till I come home)
I can't brave this all alone

Quarantine my heart, baby
In someone else's arms
I feel unhealthy

How can we survive and finally live our dreams
In a world filled up with players on opposing teams?
Darling, how can I go on?
Sing me one more song

Not even an hour on the interstate
Such an unforgiving journey
An eternal wait
And I hit the cruise control
There's a swelling in my soul
It's so good

I speed up and get home
To find you again

Quarantine my heart, baby
In someone else's arms
I feel unhealthy
(So never let me go)
If I can't feel your heart beating
I might as well just write off love completely

Clogging up my mind
Gotta get it out
(Get it out)
Open my mouth and let it out
I've tried, and trust me
It's not the same with anyone but you
I swear to God it's true

Quarantine my heart, baby
In someone else's arms
I feel unhealthy
(So never let me go)
If I can't feel your heart beating
I might as well just write off love completely

Check my pulse
I think I've had too much, baby
