

# Primal Scream, You're Just Too Dark To Care

Morning comes  
All your friends are dead or gone  
You sit there staring at the wall  
You tripped you took a long hard fall  
You can't sleep, you're cold  
You're numb you're wasted, you feel beat  
You get burned  
You hurt like hell you'll never learn  
You'll just do what you always do  
When people wash their hands of you  
Lose yourself in alcohol and any drugs you find  
Nobody can help you when you're this far down  
Nobody can help you when you're this far down  
Nobody can help you nobody can help you  
Nobody can help you when you're this far down  
No one but you  
Nobody but you  
Nobody but you  
Nobody but you
