

# Princessa, I Won't Forget You

The fading light of day lingers on your sleeping face  
My lover's lullaby lately lost its tender grace  
Somewhere in your dreams tonight  
Let my lips come close to you and hold me tight  
After all I hardly bear  
To turn my back to loving arms and leave you there

Chorus:

Baby, I won't forget you  
And I won't regret you  
I won't forgive you  
Anymore, no more

We said our first hello beneath a blue umbrella sky  
A simple moment shared by strangers who were passing by  
People say when you're in love  
It seems as if tomorrow almost never comes, no never comes  
After all your loving touch  
Through my eyes of love to me it means so much  
And that's why

Chorus:

I won't forget you  
And I won't regret you  
I won't forgive you  
Anymore, no more  
I won't forget you  
And I never let you  
Anymore, no more

Chorus
