

Progress, Newsflash From The 21st Century

Wake up now and start being there
It's the last of the polar bears.
Our children fighting our fathers wars
Our sisters and mothers sold of as whores
Continued war in the middle east
As soon the oil fields will simply cease.
Don't walk away when you see injustice rule.
Stop being used as an subservient old tool.
Start now, fight back. We are the ones who make a change
Stand up, resist! The earth needs you
A social revolution is what we're singing for.
Every life lost, one too many. It's time to keep the score.
