

Prong, Dark Signs

Be careful what you want, it may be what you get
Careful of yourself, you may just kill yourself
Watch out for all the ruin that you ask for
Being trapped below, is that what you need?

Careful what you get, it may just get you back
How much more? Relive the nightmares of the past
Think twice about the ruin that you ask for
Still ignoring all the warnings you see?

A lifetime wronged you
Dark signs warned you
Feel me self destruct

You're gonna get exactly what you're gonna let
You suffer more and more and then you blame yourself
Those signposts that point to disaster
Ignore the signals, you get what you see

A lifetime wronged you
Dark signs warned you
Feel me self destruct

Gonna self destruct
Gonna self destruct
Gonna self destruct
Gonna self destruct

Dark signs warned you
Feel me self destruct

Be careful what you want, it may be what you get
Careful of yourself, you may just kill yourself
Watch out for all the ruin that you ask for
Being trapped below, is that what you need?
