Psychotic Waltz, Haze One

now we're on the road the freeze is coming on everone is sleeping now the first one to bed, but the last to leave my head so i burn another number down

and as i'm laying down i'm wondering where are all the people now where is all the screaming crowd and as i bring on what's inside of me i know it's quite a dream

burn the candle down
as we're pulling out of town
pass the haze around
talk about the show
got another less to go
hey, what did you think about the sound?
cold november's got me burning down
cold november's got the amber burning down

now me ears are ringing
i don't mind the sound
concerned about my singing
cause the cold can bring it down
east berlin to austria
how much further now?
i hope it is a long way
i have to sleep before the day
