

Pyogenesis, Underneath Orions Sword

(Music: Flo Schwarz lyrics: Tim Eiermann)

It's cold here, show me the sky you see

I don't have wings to fly but I have a will

This way - I feel

A lie - is real

Screaming for heaven, resting souls rebirth

Cause we are undead fading away

No will to live, the pain, we can't stay

We are undead fading away

There's no return only dismay

I've tasted life, worlds air I breathe

But my lungs are dry not able to work

The way - I feel

A lie - is real

Screaming for heaven, resting souls rebirth

Cause we are undead fading away

No will to live, the pain, we can't stay

We are undead fading away

There's no return only dismay

All ends here - nothing's like it was before

Lost my will to live and lost all I adore

I've lost it all

Cause we are undead fading away

No will to live, the pain, we can't stay

We are undead fading away

There's no return only dismay
