Pyogenesis, Underneath Orions Sword

(Music: Flo Schwarz lyrics: Tim Eiermann) It's cold here, show me the sky you see I don't have wings to fly but I have a will This way - I feel A lie - is real Screaming for heaven, resting souls rebirth Cause we are undead fading away No will to live, the pain, we can't stay We are undead fading away There's no return only dismay I've tasted life, worlds air I breathe But my lungs are dry not able to work The way - I feel A lie - is real Screaming for heaven, resting souls rebirth Cause we are undead fading away No will to live, the pain, we can't stay We are undead fading away There's no return only dismay All ends here - nothing's like it was before Lost my will to live and lost all I adore I've lost it all Cause we are undead fading away No will to live, the pain, we can't stay We are undead fading away There's no return only dismay
