## Queensryche, I Dream In Infrared

(Michael Wilton, Geoff Tate)

As you awoke this morning and opened up your eyes Did you notice the tear-stains lining your face were mine

Don't you wonder, can't you see what's happening to our lives I can't keep living this masquerade When my lonely eyes see only your face at night

I only see in infrared I can't dream anymore Can't you see I need, too I can't stand the pain

You've gathered all my secrets and I don't know who I am I even feel alone when you're near 'cause you'll never understand

When we first met I must have seemed a million miles away It's strange how our lives have touched But the time is right I'll leave tonight Don't look in my eyes 'Cause you've never seen them so black

I only see in infrared I can't dream anymore Can't you see I need to I can't stand the pain
