

Quiet Riot, Blind Faith

[Verse 1:]

Ive been the distance and Ive seen it all
Ive been turned around by love and hate
I have resided in my private hell
But I love this life and I live to tell

[Chorus:]

Blind Faith is the cause of the trouble
Blind faith what we bleed

[Verse 2:]

When I was young I didnt realize
There was hope and fear with no compromise
And now I testify before myself
I keep walking on in my innocence

[Bridge:]

I know if you follow me- you get what want, you get what you need
Somebodys got to set you free- you get what want, you get what you need
Now dont you give it and learn to breathe
You hear a message now before you leave
You know the fortune here that you have found
There aint no doubt about it, there aint no doubt about it
