

Quietdrive, I Lie Awake

Can you hear me screaming
Coming to find you
It's not that I want to
Make it another night alone
This feeling is lonely
Sending me slowly
Hits me so deep
It cuts my bone
Fills my heart
Burns me up
For way too long
For way too long
Here's my hand
Pull me up

Chorus
I lie awake because I'm scared
I'm not as fake as you once heard
But we'll lay down now making sure we
Put these words between us

Can you hear us falling
We're falling faster
It's hard to remember
Where we were at a year before
I thought we were ready
I thought we were steady
'Till the emotion
Hit the floor
Fills my heart
Burns me up
For way too long
For way too long (where did you go)
Here's my hand
To pull me up

Chorus
Don't put these words between us

I lie awake because I'm scared
I'm not as fake as you once heard
But we'll lay down now making sure we
Put these words between us
I lie awake because I'm scared
I'm not as fake as you once heard
And we'll lay these words
And we'll put them down
On the floor beneath us
Don't put these words between us
Don't put these words between us
