

Radford, Dead Heart

from the back seat of a stolen car
to the back door of a sleezy bar
your a victim of circumstance

you must see what it feels like
you must see what it feels like
what it looks like
you know you know you got a dead heart
i always said it's gonna' tear us apart
and when the devil comes he'll wear your face
you know you know you got a dead heart

from the front room of a pent house
to the bedroom of a whore house
you evicted and know where to go

you must see what it feels like
you must see what it feels like
what it looks like
you know you know you got a dead heart
i always said it's gonna' tear us apart
and when the devil comes he'll wear your face
you know you know you got a dead heart

they must see what it looks like
they must see what it looks like
they must see what it feels like
you know you know you got a dead heart
i always said it's gonna' tear us apart
and when the devil comes he'll wear your face
you know you know you got a dead heart

you know you got a dead heart
you know you got a dead heart
you know you got a dead heart

you know
