

# Radiatorama, Touch Me Now

I know babe that love is blind  
Heaven thinking with your mind  
You gave much more than you have received  
Understand the time as past  
..... the blast  
And this one more chance is what you need

Touch me now, open your eyes  
Feel what you can feel but don't waste your time  
Touch me now, open your eyes  
Feel what you can feel but keep it inside

Hold me now. The sun is so bright  
Hold me now. You feel it inside  
Hold me now. The moon is so light  
Hold me now. That sweet emotion

Try to find the reason why  
You have to leave aside the pride  
Only saw you find a way to dream  
Take this night just like a test  
And the time will do the rest  
Come on darling start and then you'll see
