## Rag'n'Bone Man, As You Are

You raised the lights when it was frightening You calmed the storm when it was rising You found me there where I was hiding All I have is here and now

If the ground beneath out feet has disappeared I'll be here beside you Always be right near you Remember me Won't you?

I know we've all got our problems And it's a blessing that we made it here so far If you lay here in these arms tonight I promise\ I promise to take you To take you as you are

When I was reaching out in the dark When Ithe streets blow jus looked so far When I forgot everything that I was All I needed was your love

If the Earth beneath our feet is old And caveed in For a second we will fight When it's late in the evening Don't let me go, dear

I know we've all got our problems And it's a blessing that we made it here so far If you lay here in these arms tonight I promise\ I promise to take you To take you as you are

take you as you are take you as you are take you as you are take you as you are

I know we've all got our problems And it's a blessing that we made it here so far If you lay here in these arms tonight I promise\ I promise to take you To take you as you are
