

Rage, Bloodlust

Fight, we will not fight again
Crashing down our swords in men
Kill and be killed for a facts
With no gain to all at last
Politicians tumble on tongue
Fight themselves than stand as one
Play with lives, they got no
Personality respect

Get up and scream - Get up and scream
Throw your fists in the air
Get up and scream - Get up and scream
Stand against the war

You see hell's weapon
Cold steel
