

# Rage, Insanity

Another day in darkland  
He killed his family  
Just couldn't see a future  
Like he was told to be

And as the great provider  
Stopped his source to survive  
He found he served the wrong gods  
A credit or his life

And then we read the news from all around the world  
'Bout all this tragedies we cannot understand  
How can you say it's only letters that don't matter much  
That you don't care 'bout all this misery in you and me

All this insanity surrounding me  
All this insanity is killing me

Another night in dreamworld  
She had it up to here  
So went up to the rooftop  
Got rid of all her fear

Well, as her head was shattered  
She made peace with her age  
There lying on the pavement  
She finally left the stage

And on the television rules an abstract life  
Where next to youth and beauty nothing can survive  
How can you say it's just a point of view, it's up to you  
While in the hidden grows this misery in you and me

All this insanity surrounding me  
All this insanity is killing me
