

Raised Fist, Too Late To Change

We're always involved in problems we can solve without anyone's help
Although we're seeking shelters that won't bend for the pressure
Whatever that might be
Maybe you can stand up and tell how the story that killed so many peoples can be real?
And I feel so disgusted when I see the things I see
I never though it was the nature of us human beings
And now I feel so strange and locked up by chains
But it's never too late to change
Too late To change Too late to change
With the same old attitude that most of the people have
We're going nowhere is that so fucking hard to understand or is it not
If not, than maybe stop act like rabies dogs in a cage full of hatred and confusion
But it's just illusion
Cause we can't change without feeling strange
Cause to be mean is the only thing we're seen
And now we feel so confident when we're behind the backup
We have (to realize or just) to shut up
Too late To change Too late to change
Wrong Not this time
You are the one who's threatening me with a knife
But I'm the only one to decide over my life time
A game is a game and your playing it just to play
Can't you realize that there is not more to say
