

Randy Newman, Something Special

All dressed up, nowhere to go
Looks so easy but it isn't you know
Hard to find what you're dreamin' of
But there's something special about our love
Different people, different worlds
You just call me, and I'll be there for you
We belong together you know it's true
'Cause there's something special about our love
It's all right,
Baby, it's ok
We're gonna make it no matter what they say
Sure as the stars shine in the sky above
There is something special about our love
People change as time goes by
Others come between
But I'll love you 'til the day I die
'Cause there's something special 'bout you and me
Something special about our love
