

# Ray Price, Talk To Your Heart

When you're alone at night with the world locked outside  
Have a talk to your heart about me  
If you told that it's right that we stay apart  
Then let me come in and talk to your heart  
[ steel ]

Loving you changed my life in just one day  
I'm waiting to hear what your heart will say  
If your told that it's right that we stay apart  
Then let me come in and talk to your heart  
[ fiddle ]

Believe you me there will be happiness when  
You open your door and let me come in  
If your told that it's right that we stay apart  
Then let me come in and talk to your heart  
[ guitar ]

So talk to your heart if it can't decide  
Remember my own is waiting outside  
Waiting alone outside in the dark  
So let me come in and talk to your heart
