

Ray Wilson, EASIER THAT WAY

The sun is shining through the trees, I'm gazing at the sky
Not long ago the winter freeze was taking its toll on me
And there are people all around me, struggling to make ends meet
While those who are responsible are living down on easy street

They didn't cause it, we only said they did.
They got it wrong and then got away with it
They sold a lie and poor people pay for it
Cause it's easier that way
Easier the way

If there's justice in the world I guess
It must be hard to see
We should focus on togetherness
It's the only way to change things
It's not easy staying faithful
To hold on to belief
When your whole damn world's been stolen and you're trying to catch the thief

They didn't cause it we only said they did
They got it wrong and then got away with it
They sold a lie and poor people pay for it
Cause it's easier that way, easier that way
Why in the world do our leaders turn away from it
Knowing full well that we all need a cure for it
Time and again the poor people pay for it
Cause its easier that way, easier the way

Ok let's take a moment to reflect

They didn't cause it, we only said they did.
They got it wrong and then got away with it
They sold a lie and poor people pay for it
Cause it's easier that way
Easier the way

Could you turn it off for a second.
