Reamonn, Flowers

She brought me flowers and then she'd say Don't give me emotion cause I'll throw it away She brought me flowers I heard her say Don't give me emotion cause I'll throw I'll throw it away Throwing it away She's got the power to make me stay I don't know if I like it but I just can't run away She's got the power to make me stay I don't know if I like it But I just can't, just can't run away Just can't run away And what I've learned-learned from this is- is that a kiss is just a kiss And what I've learned- learned from her Is that to love you gotta be who you are No You can't just turn- turn away from who you are what you wanted to be You gotta learn- learn to see that it not enough- enough for me I want it all I want it all right or wrong right or wrong I want it all I want it all She brought me flowers just to say She'd packed her bags she's leaving she's on her way She brought me flowers and that's ok Cause some things last forever and some things fade away
