

Red, Out From Under

Knocked off my feet
The earth moved beneath
The edge of a dream and a nightmare
Open the door
Fell through the floor
Slipped through the cracks into nowhere
So tell me where were you
When everything fell down like thunder
I begged you to pull me through
I couldnt get out from under
I took the fall
I took it all
Last night was just an illusion
Cut me, I bleed
Feel me in need
I finally broke in the pressure
So tell me where were you
When everything fell down like thunder
I begged you to pull me through
I couldnt get out from under
Left me for dead inside my head
Couldnt you see that I was still breathing?
Screaming, I reached for you
I couldnt get out from under
Where were you?
I reached for you
The pressure broke me down
Where were you?
I reached for you
The pressure broke me
Where were you?
The pressure broke me
Where were you?
The pressure broke me
Where were you?
I reached for you
Pressure [x3]
