## Red, Out From Under

Knocked off my feet The earth moved beneath The edge of a dream and a nightmare Open the door Fell through the floor Slipped through the cracks into nowhere So tell me where were you When everything fell down like thunder I begged you to pull me through I couldnt get out from under I took the fall I took it all Last night was just an illusion Cut me, I bleed Feel me in need I finally broke in the pressure So tell me where were you When everything fell down like thunder I begged you to pull me through I couldnt get out from under Left me for dead inside my head Couldnt you see that I was still breathing? Screaming, I reached for you I couldnt get out from under Where were you? I reached for you The pressure broke me down Where were you? I reached for you The pressure broke me Where were you? The pressure broke me Where were you? The pressure broke me Where were you? I reached for you Pressure [x3]
