

Red Tape, Reactor

Don't come over here my solar system's in ruin
All I need is a little bit of glue
I'm under construction
Contradictions rising we must deflect
Run this escape route
Let our radiation burn

And maybe I'm predictable
But I'm like "fuck it";
All revolution
Reactor
It's energized
You see it in my eyes

I sing a song to iran
There is no compromise
Western cities in flames
Like it was halloween
You're paranoid of perestroika
You run
Changes are treason through shallow eyes

Our heroes suck
Our leaders suck
They're going to china
Like the kgb

Western hemisphere is stuck
Our leaders on a slowboat to china
Where they still play pac-man
Just like it's 1983

Disruption fuels the fire in our laboratories
From sleepless efforts we fuse the strengthening
It's a little bit of glue
And activist extension
Bombarded by gamma rays
Our product will live today
