Redlightmusic, I Found You

If everyone laughed all at once
Would it bring us world peace?
If I floated on a glacier dove
Would you be there, be there with me?

If everyone were a grain of sand
Would we all be desert born?
If I tipped my hat in righteousness
Would you be there, be there with me?

I've reached out in the distance with faith
Across fields of pain I've tried to be true
I've stretched out all the love I have wide
And I found, I found you

If everyone sang all at once
Would it be in harmony?
If I lit a torch for childhood love
Would you be there, be there with me?

Wanting, so wanting
I'm haunted by your lack of compassion
Wanting, so wanting
Let's sing out loud and right the wrongs

I've reached out in the distance with faith
Across fields of pain I've tried to be true
I've stretched out all the love I have wide
And I found, I found you
And I know it's going to last
I found, I found you
And I know it's going to last this time
