

# Regina Regina, Before I Knew About You

(Gary Burr/Tom Shapiro)

Before I knew about you  
The moon was just a rock  
That hung there silent in the sky  
Before I knew about you  
I guess its all the dreams  
Were just a way to pass the night

Nothing, I heard nothing  
When I listened to those love songs  
I wondered, was it something  
I was missing  
Then you came along

I didn't know  
I could ever be so loved  
I didn't know  
That I could give so much  
I didn't know  
In this life a heart could be so true  
I didn't know a thing  
Before I knew about you

Before I knew about you  
I thought of only me  
And how'd I get from day to day  
Before I knew about you

I didn't mind the lonely  
I never learned another way

I was in the darkness  
So it rocked me  
Then around came on  
A new life, it started  
And it shocked me  
How far I had come

I didn't know  
I could ever be so loved  
I didn't know  
That I could give so much  
I didn't know  
In this life a heart could be so true  
I didn't know a thing  
Before I knew about you

I didn't know  
I could ever be so loved  
I didn't know  
That I could give so much  
I didn't know  
In this life a heart could be so true  
I didn't know a thing  
Before I knew about you
