

Relish, Little Flame

Through the darkened streets all alone in a room,
Shines a little flame,
Music man with your tunes and your love,
Bless us as you play.

Little flame, letting your light shine through,
Little flame, showing us all the truth.

There's a man stood at the window,
Looking out into the night,
She puts her arms around him and she smiles to let him know,
Everything's alright.

Little flame, letting your light shine through,
Little flame, showing us all the truth.

We've all been alone,
Left in the dark,
But you were there,
Little flame, letting your light shine through,
Little flame, showing us all the truth,
Little flame.
