

Remedy, Never Too Loud

(Rose Tattoo)

Well mister I got something to say
Don't tell me how to live, don't tell me how to play
Don't give me no lecture, don't try to tell me what to do
Listen to what I'm telling you

It's never too loud and it's never too strong
The banner of a working class man
It's never too late and it's never out of date
The music of a rock 'n' roll band

Don't gimme your voice, we'll give 'em no choice
We'll never take the shit they dish out
We're gonna be heard and we'll have the last word
You know we're the voice of the crowd

And as their ears start to bleed
The weak start to plead
It's never too loud, it's never too loud
It's never too loud, for a rock 'n' roll crowd

We gotta use brains to start making things change
Before it's too late to speak out
We're gonna strike now while the iron is hot
Let them feel the weight of our clout

Hit them so hard, hit them so fast
They'll never keep us down again
We're making them see, they're fightin' you and me

We're gonna see it through to the end

And as their ears start to bleed
The weak start to plead
It's never too loud, it's never too loud
It's never too loud, for a rock 'n' roll crowd
Oh it's never too loud

Gotta get wise or they'll tell us more lies
If we believe what they say
Gotta find the truth or else there ain't no use
Tomorrow won't be a better day

So hold your head high, spit in their eye
You gotta start walking real proud
Come on now boys, make a lotta noise
Don't be afraid to sing out

And as their ears start to bleed
The weak start to plead
It's never too loud, never too loud
It's never too loud, for a rock 'n' roll crowd

It's never too loud, no it's never too loud
It's never too loud, no it's never too loud
Never been too loud

It's never too loud, for a rock 'n' roll crowd
