

Renee Renee, Paper Dolls

Milions of people looking for love,
is it a secret from heaven above?
wheeling and waiting wishing for more,
oh somebody save me and unlock my heart.
Seasons are changing the passage of time,
living in sequence, don't stop out of line
can anyone see this? is everyone blind?
and walk throught the darkness, just follow the light.
I see what I say, I say what I see, this everything seem so different to me
I saw what I sad, I sad what I saw, comein' in diferrent just runin' the hot
we've been writing on the wall precious paper doll, tha pain just fall apart
I just can't shake it from my head all the things you said, they only brake my heart
Stop out of your comforts and render your fears,
jumping from windows, suckin' up tears.
Reason of knowledge changing the gears,
remember be honest, forget all those years.
I see what I say, I say what I see, this everything seem so different to me
I saw what I sad, I sad what I saw, comein' in diferrent just runin' the hot
we've been writing on the wall precious paper doll, the pain just fall apart
I just can't shake it from my head all the things you said, they only brake my heart x2
remember that first kiss, when times was lost and love was missed
recall my finger-tips, for rest your neck and gig your breast.
we've been writing on the wall precious paper doll, the pain just fall apart
I just can't shake it from my head all the things you said, they only brake my heart x2
