Reset, Wide Open

Open
Open up your mind
Stand up straight
And everything will be fine
I know you've been alone
For a while and you
Thought that it would last
You've got to concentrate
And forget about the past
I know the pain
Your going through
But it's only passing by
And I know the pain
Your going through
But please remember
That any time
You can come my way
It's your fault
It's my fault
Who cares
Lets do it all again
