

# Return, Friends Will Be Friends

Since the end of our glory days, i've been feeling down and out  
They just don't make 'em like they did  
I've been hanging out on our street hoping there's a chance  
We'd meet as if i knew just what to say  
I took it wrong right from the start lies just tore us apart

Friends will be friends forever more  
You can't erase what's in your heart  
Friends will be friends if we really try  
'cause friends are hard to find

Did we do what was right back then so easy to loose a friend  
Well it ain't the same anymore  
I sure miss the good times we had all the memories make  
Me Glad wish i could do it all again  
I took it wrong right from the start lies just tore us apart

We could have stayed tight for a hundred years but we...  
We had nowhere left to go
