

Rialto, Deep Space

What if there's another world
Circling a distant star
And on this planet lives a girl
Won't you tell me where you are?

(CHORUS)

I'm in deep space
I think I'm falling
And I feel like I'm a million miles from home
I'm in deep space
Can you hear me calling?
'Cos I'm searching for the light to save my soul
Is there anybody there that can pull me out of this black hole?

From the past right to the present
I've been waiting for a sign
For an angel sent from heaven
A rocket in this starless sky

(REPEAT CHORUS)

Well I built myself a capsule
And I've drifted days and nights
When I look into the darkness
There's a vacuum in my life

I'm in deep space
I think I'm falling
And I feel like I'm a million miles from home
I'm in deep space
Can you hear me calling?
'Cos I'm searching for the light to save my soul
Is there anybody there that can pull me out of this deep space?

I'm in deep space
I'm in deep space
Is there anybody there that can pull me out of this deep space?
