

# Rialto, Someone That She Used To Know

She's got a telephone voice  
That I haven't heard in quite a while  
But I've seen her with boys  
That I didn't think would be her style

Always around out on the town  
She can barely say "hello";  
Waving at her watching me drown  
I'm just someone that she used to know

The screeching of brakes  
Of a taxi in the midnight rain  
Is all that it takes  
To bring it back to her again

See her around out on the town  
She can barely say "hello";  
Waving at her watching me drown  
Just someone that she used to know  
Someone that she used to know

See her around out on the town  
She can barely say "hello";  
Waving at her watching me drown  
Like someone that she used to know

See her around out on the town  
She can barely say "hello";  
Waving at her watching me drown  
Just someone that she used to know
