

# Richard Hawley, Our Darkness

When evening shadows fade, I turn to my true love  
She has the strength to say, the words that I cannot

In darkness, our darkness  
So heartless, this darkness

I'm lost here in the grey, I wait for your returning  
I watch firelight play, flames flicker with my yearning

For darkness, our darkness  
So heartfelt, this darkness

Through streets and avenues, will you come back to your lover  
The place for me and you, is here with no other

In darkness, our darkness  
So heartfelt, this darkness

My arms they open up for you  
And where they fall it cuts the root  
We talk of understanding  
And we talk of love

When evening shadows change, I turn back to my true love  
She has the strength to say, the words that I cannot

In darkness, our darkness  
So heartfelt, our darkness  
So heartless, this darkness  
Our darkness, in darkness

We talk of love
